EDUCATION

UNC Chapel-Hill Boot Camps | Chapel Hill, NC

Full-Stack Developer Certificate

July 2021

GPA: 4.0

Coursework: HTML5, CSS3, JavaScript, jQuery, Bootstrap, Express.js, React.js, Node.js, MongoDB, MySQL, Git, C#, APS.Net, Database Theory, Agile Methodology, Progressive Web Apps

SKILLS & TECHNICAL TOOLS

- **Languages:** TypeScript, JavaScript (ES6+), Java, Python, SQL (**PostgreSQL**/MySQL), HTML5, CSS3.
- **Frameworks & Libraries:** React 19, Node.js, Spring Boot, Express.js, Vite JS, Angular, Bootstrap.
- **Cloud & Databases:** PostgreSQL, MongoDB, NoSQL, AWS, IBM Cloud, Kubernetes, Docker.
- **DevOps & Tools:** GitHub Actions (CI/CD), Cypress JS, RESTful APIs, GraphQL, Git, Jira, Vercel.
- **Specialized Skills:** AI/LLM Integration (RAG), Agile/Scrum Leadership, Microservice Architecture, Cybersecurity Remediation, Continuous Integration/Delivery (CI/CD).

FURTHER EDUCATION

Artificial Intelligence Fundamentals Certificate, IBM (2024)

Enterprise Design Thinking Team Essentials for AI Certificate, IBM (2024)

AI Fundamentals, Level 1 Certificate, IBM (2023)

Software Apprenticeship Program Certificate, IBM (2022)

Containers and Kubernetes Certificate, IBM (2022)

Dockers Essentials Certificate, IBM (2022)

Cloud Essentials Certificate, IBM (2022)

Cloud Core Certificate, IBM (2021)

Agile Explore Certificate, IBM (2021)

Enterprise Design Thinking Co-Creator Certificate, IBM (2021)

Enterprise Design Thinking Practitioner Certificate, IBM (2021)

Big Data 101 Certificate, IBM (2021)

Developer First Year Certification, IBM (2021)

Complete JavaScript Certificate, Udemy (2021)

EXPERIENCE

Software Engineer | ServiceTrade Inc. 2024 - Present

- **Architected automated CI/CD workflows** using **GitHub Actions** and **Vercel** to provide real-time code monitoring and seamless deployments for scalable microservice environments
- **Engineered a scalable CI/CD pipeline** that enhanced testing efficiency and delivery velocity, enabling the team to handle increased production load and complex deployments
- **Reduced customer support resolution time by 90%** by designing and implementing a standardized peer code review process adopted across multiple engineering teams.
- **Developed a high-impact microservice** for the ServiceTrade mobile application, enabling field users to interact with dynamic forms and improving daily operational workflows.
- **Built internal full-stack tools** utilizing **Node.js, React, and TypeScript**, leveraging RESTful APIs to streamline internal data management and team productivity
- **Spearheading AI integration initiatives** by researching and implementing **Large Language Models (LLMs)** to enhance microservice capabilities and automate complex product features.
- **Spearheading AI integration initiatives** by researching and implementing **Large Language Models (LLMs)** to enhance microservice capabilities and automate complex product features.
- **Architected automated CI/CD workflows** using **GitHub Actions** and **Vercel** to provide real-time code monitoring and seamless deployments for scalable microservice environments.
- Accelerated the migration of 400+ customers from legacy systems to a proprietary microservice architecture, reducing the projected delivery timeline from six years to two.

GRC Platforms Software Engineer | IBM CIO Cybersecurity Assurance & BISO 2022-2024

- Developed solutions for IBM CIO using IBM OpenPages with Watson
- Delivered quality code to GitHub, remediated vulnerabilities, ensured CI/CD compliance, created cloud application and microservice solutions, wrote unit tests for business workflow in Cypress JS
- Generated backlog grooming in Jira, led scrum meetings, oversaw vulnerability mediation, guided peer code reviews

Software Engineer Apprentice | IBM CIO Cybersecurity Assurance & BISO 2021-2022

- Successfully completed the Software Engineer Apprenticeship Learning Path program four months early
- Conducted coursework in JavaScript, Angular, React, Java, Python, Cloud Computing Design Thinking, Agile Thinking, Unit Testing, and Workplace Environment Skills
- Transitioned to a full-time employee at IBM

Distribution Receiving Specialist | Weaver Street Market 2020-2021

- Provided customized warehouse assistance and distribution to multiple vendors
- Supervised quality control, inventory systems, and daily deliveries
- Accurately and effectively shipped orders to five stores and multiple restaurants

Dairy Specialist | Weaver Street Market

2019-2020

- Oversaw two departments, associated staff, and orders
- Took the initiative to implement programs to reduce overall shrink
- Provided training for all new employees in the department

Produce Lead | Weaver Street Market

2015-2019

- Managed and organized all inventory and implemented a new ordering strategy that reduced loss by \$12,000 annually
- Trained all new employees and delivered outstanding customer service

Dairy Manager | QFC/Kroger

2014-2015

- Managed and retained a \$4 million dairy department
- Reduced loss for the department by \$15,000 annually
- Restructured the inventory management system to reduce over-delivery

Dairy Manager | Safeway, Inc.

2002-2013

- Managed and retained a \$3.6 million department and reduced shortage by 70%
- Consistently exceeded the company's secret shopping program
- Evaluated deliveries against invoices and monitored losses

PROJECTS

IBM OpenPages with Watson for IBM Corporate Assurance and Finance Business Controls

| *Java, JavaScript, React JS*

- Created microservices applications to extend the OpenPages application
- Connected databases to the OpenPages application for business use

IBM Business Controls Tool | Java

- Oversaw vulnerability management on legacy code and created a vulnerability report using IBM AppScan
- Designed a team plan to ensure the application was compliant with company policy by a target deadline
- Maintained and assured data integrity of Enterprise Application Library database via IBM Cloud

IBM Intellectual Property Licensing | Java

- Created a workflow system for the team to create feature branches and deliver to the main GitHub repository
- Oversaw monthly scans of the application and remediated all vulnerabilities written in JavaScript

ServiceTrade Internal Tools | *typescript, javascript, react, vercel*

- **Architected a full-stack React 19 and Node.js application (IMTools)** that streamlined enterprise asset management and reduced technical debt by implementing a validation engine to perform "dry run" data verification before production pushes.
- **Engineered an AI-powered code generation assistant** using the **Gemini API and Retrieval-Augmented Generation (RAG)** to automate complex dispatch rules, while modernizing the platform with session-based authentication and asynchronous multi-file upload capabilities.

MEDIA APPEARANCES

Interview

Le Monde | September 21, 2022

“In the United States, workers and blue-collar workers are investing in high-tech” (translated from French)
